This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world’s books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that’s often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book’s long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ **Make non-commercial use of the files** We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ **Refrain from automated querying** Do not send automated queries of any sort to Google’s system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ **Maintain attribution** The Google “watermark” you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ **Keep it legal** Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can’t offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book’s appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THE Dictionary of the Bengali language now offered to the public, is the result of several years' assiduous application more particularly directed to this special object. Early on his arrival in this country, the Compiler became sensible of the want of such a medium between the meagreness of a mere vocabulary and the diffuseness of the more elaborate species of Dictionaries. At the period when this work was undertaken, there were extant only the vocabulary of Mr. Foster and the large quarto of Dr. Carey.

The former, considered as the first effort in Bengali Lexicography of any Europeans, must be considered to bear high and ample testimony to the skill and judgment of the author, as well as to his extensive acquaintance with the language. Deficient, it certainly is; but the Compiler's unassuming profession, Ver la pretense ailleurs, precludes any charge on that ground. Still it contains a mass of most valuable materials for succeeding lexicographers, though in a state, it must be confessed, somewhat chaotic and difficult of application by a tyro in the language; and the student, as he advances, must often be struck with the Compiler's accurate acquaintance with the idiomatical and colloquial applications of terms, considered as mere vocables, little connected with their general notions. Those who have made most proficiency in this tongue are duly sensible of the real excellence of the work, and it must be evident, to one competent to pass a judgment, that Mr. Foster has been no scholiast in the general principles of language. Had his arrangement been better, his Vocabulary would only have needed due enlargement to answer all the purpose of a standard Dictionary. The work must be owned, however, is extremely defective, is disfigured and deteriorated by a large admixture of Hindustani, &c. and is become, moreover, both scarce and dear. Yet it would be an extreme injustice, quite unworthy of an aspirant to literary excellence, to withhold a tribute due to the labours of one to whom the Compiler of the present work acknowledges himself under the greatest obligations.

The ponderous quarto of Dr. Carey include a compilation of a widely different character, in bulk, assuredly, exceeding the product of all others together in this field; and if estimated by that measure, they must be allowed, without dispute, to take the first place in the list of works of their class. From these also the Compiler has drawn freely, as from a storehouse of vocables, for the accumulation of which Dr. Carey has laid him and all other learners of Bengali under great and lasting obligation. A student of the language who would greatly add to his store of knowledge by finding in these large volumes the actual existing vocabulary of the population, free from a strange and heterogeneous admixture of foreign terms, Persian, Arabic, &c. with every imaginable corruption of the colloquial medium on the one hand, as well as of high unnaturalised Sanscrit words on the other. The approved standard among respectably educated natives is equally removed from both extremes, from the barbarism and vulgarity of the one, from the pedantry and unintelligibility of the other. In no accredited Dictionary of any literary language are the gross vulgariams of the boor and the low artisan admitted to hold a place, which decency and good taste refuse them.

With regard to the higher style, indeed, the derivatives of the learned language of India differ materially from many Western tongues; inasmuch as the former are absolutely dependant, for scientific, theological, and general literary terms and phraseology, on the polished language of the Brahmins; the Bengali perhaps more so than any of its cognate dialects; and, in general, a polished and learned style must necessarily be formed on the model of the Sanscrit, as well as furnished from its vocabulary. A due discrimination is, however, indispensable in detailing the meanings of pure Sanscrit terms, many of whose native applications are quite unknown to the derivative dialect. Dr. Carey's great work is as much depreciated in value as it is augmented in bulk, by a mass of matter utterly irrelevant to the study of the provincial tongue; in nearly every instance, the Sanscrit Dictionary of Dr. Wilson being transcribed verbatim into his pages, to the utter confusion of the student, who is thus set adrift on an unknown ocean of words without pilot or compass. That in the course of time, as the Bengali becomes cultivated, refined and polished, large accessions will accrue from the higher source, may not be doubted; nor should many words or senses, at present little in use
or only employed in some few of the higher compositions, be rejected, if elegant in themselves or necessary to a just expression of current ideas. Many such will be found in the present compilation.

Exotic terms, whether of Arabic, Persian or European origin, are not of the language whose vocabulary is intended to give, and are therefore deservedly excluded, as actual corruptions of a dialect sufficiently rich to be independent of foreign accessions, which it is incapable of enunciating justly or euphonically, to the manifest injury of its harmony and uniformity, while it may draw naturally and to any extent desirable from the Sanscrit.

The Sanscrit is distinguished, even beyond the polished language of the ancient Greeks, by the extent of its capabilities in the composition of terms, and the facility with which the same construction may be united in their expression. The Bengali bears this mark of its affinities in an eminent degree. The rules for the most current compositions are so easy and regular and they apply so universally, that to collect those even in daily use in the alphabetical order of a Dictionary, would be a task as useless as laborious, and swell the bulk of a volume without corresponding advantage; rather, to the manifest inconvenience of the student, who instead of a portable octavo would be compelled, as at present, to wade in search of a common simple term, through an endless list of formations and compounds; of which from 500 to 550 and upwards may be numbered in every part of the volumes of Dr. Carey. Nay, in two places, under श and ज, the body of the vocabularies of the language is duplicated and triplicated, occupying together no fewer than 390 pages of the whole work! It cannot but excite astonishment, considering the really extensive acquirements and acknowledged talents of the respectable author, that his labour should have been so fruitlessly expended both to himself and to those whom it was intended to benefit. On the other hand, the more philosophical compounds, such as are formed by aggregation or composition of terms, are actually limited only by the vocabulary of those latter, and are producible ad libitum: the attempt to include such is therefore out of the question. The more usual only are comprised in the present work.

The Sanscrit Dictionary of Dr. Wilson is beyond all praise from the Compiler of this volume, as the production of a Scholar who thought for himself, and who, even in availing himself of the labours of his predecessors, has, by an exercise of judgement and discrimination and by personal toil, rendered that his own which has received its modification and arrangement from his mind. Of this invaluable work large use has been made, to the manifest enrichment of the present publication.

The Amara Coasha and other works altogether native have been carefully consulted, and in some of the latter pages, a few hints have been taken from the small vocabulary recently published by Téascimento Dett. The Abridgement of Carey's Dictionary being merely a reduction of the bulk of that work, retaining all its peculiarities though measure in its explanatory portion has been of no additional service.

The Shabda Cúpā Drūma, now in course of publication by Bahoo Háadhá Cánta Deb, whose talents and useful labours reflect the greatest credit on himself and his fellow countrymen of this province, and promise to be of eminent service to the students of Hindoo literature, has been consulted as far as published. The Compiler having been, with equal kindness and liberality, favoured by that gentleman with a copy of the extant portion of his elaborate work, takes this opportunity of offering his grateful acknowledgements to him for the aid thence derived.

In the native part of the work, the Amara Coasha, an edition of the same with Bháasha interpretation, and the school vocabulary of Rāmchandra Sharma, have been of considerable use; though by far more than three fourths of even that part of the work are entirely original, the result of personal reading and selection, with such aid as could be derived from native assistants. From these latter, it would not easily be credited by the mere European student, how little effective co-operation is obtained where thought and research are required; as a single term cannot safely be admitted uncorroborated by citation or other sufficient authority; and even in the more mechanical species of assistance, the most rigid inspection must be incessantly exercised. It is with true regret that the Compiler is compelled by strict verity to exclude from any participation in the merits of the present publication, whatever they may be, those by whom he has been assisted, the extent of whose services has been limited entirely to the labour of reference or the detection of literal errors and idiomatical inaccuracies. He bails, however, with delight, the augmenting disposition to cultivate an acquaintance with several of the principal native scholars have been eminently forward, and begs to throw the present mite of contribution into the general treasury from which the great source of knowledge, which is the cause of Man in all varieties of his race and conditions of his being, is to be advanced.
After the foregoing observations, a simple inspection will sufficiently explain the plan of the present work, which is to embody with explanatory English the synonyms of the Bengali language, to answer the double purpose of furnishing—to the European, the means as well of fixing the peculiar application of the terms explained, by corresponding native words, as of varying his phraseology; and to the native student, together with an explanation of his national tongue in its own words, a similar in the English language; so that whether he design to study the latter or to confine himself to the former, he may in either case be furnished with the requisite assistance. Nothing of this kind has yet appeared, which alone might serve to justify the present attempt to supply the deficiency.

It will be found to contain the great body of the language with its most important derivatives and compounds, and even those of regular formation, wherever any peculiarity of notion or application exists. Those not so circumstanced, as also a large proportion of negatives, &c. formed by the prefixes ꞇ, ꞈ, &c. have been omitted in coincidence with the Compiler’s object, which was to comprise all that was indispensable to the study of the language within the compass of a moderate Octavo, by its size and price accommodated to general use. A few of the earlier sheets are less furnished with synonyms than the rest of the work; but throughout, the explanatory portion, it is believed, is not chargeable with many serious deficiencies, being fuller than in any work preceding it, not excepting the quarto of Dr. Carey, some of whose omissions, by no means few nor unimportant, have also been supplied. The synonyms follow in the order of the English explanatory terms. The notation of parts of speech has been omitted as inapplicable to the native grammar, (to the rules of which alone the language can be advantageously subjected,) a semicolon only being used wherever, according to English notions, a word assumes the form of a different part of speech, the same word in Bengali answering, in numerous instances, the purposes of several. The number of words originally promised has been exceeded by nearly 3,000; and a considerably greater expenditure of time and labour and consequent augmentation of charge than were contemplated, have been unavoidable, from the necessity, in part, of more extensive reading and the consultation of numerous authorities, in part, from successive removals and domestic calamities.

That he must have fallen into errors, and that deficiencies will be found to attach to his work as to every thing human, the Compiler is perfectly assured; his hope is they will neither have been greater nor more numerous than, considering the nature of the compilation, the little aid to be derived from native assistants, the peculiarities of the idiomatical applications of terms in a language not his own, and the difficulty of decision in innumerable instances—was to be expected. He can safely aver, however, that the whole is the result of actual personal labour, having no where excused himself from the duty of verifying, as far as possible, such interpretations as he has taken from others, and that his most strenuous endeavours have not been wanting to render the work, as far as his abilities, attainments and resources admitted, worthy of the encouragement and support of the public; and it will be found, he ventures to think, from the peculiarity of its plan, particularly calculated to aid the now accelerating progress of general education in this country.

The labour of such a compilation, especially that of fixing upon the just synonymous expressions, can only be appreciated by such as have been similarly engaged, who well know the reason Scaliger had for his strong language on the subject—

"Si quern munet sententia judicia olim, Damastrum arnunnis supplicisque capet; Lexica contexta, nam cetera, quid moror? omnes Pusarum facies hic labor unus habet."

Such as it is, it is now submitted to the Public and subjected to the animadversion of Scholars, in the words of a still more classical authority—

"Si quid novitati rectius istis, Candidus imparis: si non, his uter equum."
